zHealth Memberships 2.0 Launches with New Features and Updated UI

New Interface.

New Features.

A New Way To Manage Memberships in Your Clinic.

Ever since we launched the Memberships Management feature in zHealth Software, we have been upgrading the tool based on your feedback. After a lot of hard work, we are happy to present an upgraded UI and new features within zHealth's Memberships tool!

This update comes with a host of new functionalities like a fresh new user interface, the ability to set multiple active memberships and to add recurring memberships with custom options, and more. Let us look at what's new in this update.

- You can set membership plan types as One-Time, Monthly, Weekly, and Custom when creating a new membership plan.

Read More

- You can quickly view the number of patients who have different membership plans, the last invoice date, remaining visits, plan expiration date, and more.

Read More

- You can set frequency and start and end dates to add a recurring membership plan. zHealth now supports multiple active memberships for a patient.

Product Updates - What's New

Patient Recall Report
We've added a new report type - Patient Recall Report. If you're a Patient Plus user (or not), you can use the Patient Recall Report to generate a report for patients who haven't visited a clinic for 3, 6, and 12+ months.

PlaceHolder Column or Ghost Column
Now, your clinic can have a 'Placeholder Column' or 'Ghost Column' under which only appointments can be added but no notes will be created or check-in can be done. This column in the scheduler is beneficial for appointments shared by all providers who need to reserve space, but not create an additional note like a whirlpool or laser room.

Checking Account for zHealthPay
We've added a 'Checking Account' page under 'Update Info > zHealthPay Edit Profile' where your providers can update their checking account details.

Patient Type in New Patient Report
We've added a 'Patient Type' column to the New Patient Report.
