

## New Signature Feature in Patient Intake and Check-in

Your clinic can now capture patient *signature* electronically during the check-in and patient intake processes. Everything gets stored automatically in your zHealth account.

Patients will be able to easily sign intake forms and check themselves in by typing their full name, selecting their signature style, and confirming their signature before submitting it. Once they've created a signature, they can save it for future use. It's that easy!

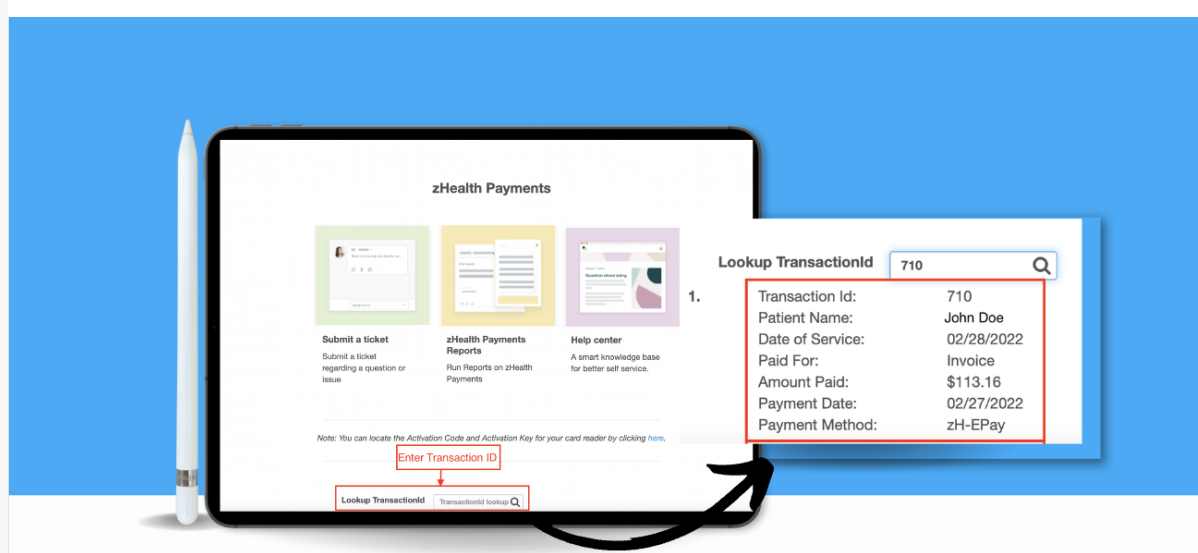

- During the Self Check-In process, patients need to sign into their account using their mobile number. Then they will be asked to add their signature. They just need to type their name and their signature will be generated automatically.

- We've added the Signature screen in the Patient Intake process as well. Once your patients complete all the intake forms, they will get the Signature screen to add and confirm their signature.

## Transaction Look-up Tool for zHealth Pay Users

We wanted to provide a quick view tool to all our zHealth Pay users so they can search any transaction-related information with one click. That's why we built this new Transaction Lookup tool to help you quickly view the details of a transaction that is pending, in progress, failed, or successful. Using the Transaction Lookup tool, you can type the Transaction ID, and we'll instantly show you the name of the patient who paid you, as well as the exact date of service and amount paid.

## Product Updates - What's New

### Missing Details Warning in Invoice

Now, you will get a [Warning Message](#) for missing Address, Gender, DOB for insured patients when creating an invoice.

### Lookup Patients

We've added a new ["Lookup Patients"](#) feature in the Patient Chart to help you quickly copy address and insurance details of a family member to a patient's account belonging to the same family.

### More Details in Claim Audits

We've added patient name, insurance details, and date of service to [Claim Audits](#).

### Updates to Reports

We've added "Diagnosis Pointers" in the [Day Sheet Report](#), four new columns in the [Billing Center Report](#), and added a new column - "Payment Method" in the [End of Day Summary Report](#).
