

## A Chiropractic Clinic Saw a 1,000% Jump in Online Reviews

Find out how this chiropractic clinic in Massachusetts took advantage of zHealth Review Plus to increase the number of patients who respond to their requests for reviews.

[Download the Case Study](#)

You don't want to pass up opportunities to get your happy patients to leave your practice an online review. That's because 84 percent of people trust online reviews as much as they would a referral from a friend.

[zHealth Review Plus](#) helps you easily collect and monitor reviews on Google, Yelp, and Facebook. These reviews can be some of the best marketing for your business.

### How zHealth Review Plus Works?

1

#### Collect reviews with a simple text

Patients are more likely to leave you a positive review soon after their appointment. [Review Plus](#) automatically sends a review request through a text message right after the appointment. Patients are asked how they would like to rate your service, from 5 (Best) to 1 (Poor). Review Plus is integrated with zHealth software, so you don't have to waste time manually entering in contact information. It's all right there in the platform!

2

#### Get reviews posted in the right places, automatically

Patients who reply with a 4-star or 5-star rating are sent another message with your facility's [Google, Facebook, or Yelp review link](#). Since most of your patients will already be signed into these platforms on their phones, a clickable review link in a text message will take them right to the page to leave a review.

3

#### Monitor the reviews on the Review Plus dashboard

Monitor all the new reviews you receive on different platforms through your [Review Plus dashboard](#). You save time with automated review requests, start getting a steady flow of reviews, and build your brand online - all while letting yourself and your staff stay focused on patients.
